

Sirs;

It is my understanding that there is resistance to XM Radio's plans to offer weather and highway coverage to it's radio offerings. Please register me as a supporter of such an important service. I am an XM Radio customer, and have found the service much more versitle than the AM and FM radio service from the local radio stations.

Our region of the country does not offer the same types of programing that can be found in larger cities, thus we are excluded from most of the services others in larger population centers enjoy. XM Radio allows me to experience those choices. To have the weather and traffic news available would provide yet another valuable service to me the consumer, tax payer.
